Art Unit: 1755

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, 10, 11 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 11 recite "n is a number from 0-2" but, "n" does not appear in the formula. In claim 4, the phrase "remaining" groups is indefinite as it fails to designate which groups are designated that the others would be "remaining". The term "types" in claim 5 is indefinite in that it is unclear how different a compound must be to be a different "type". With respect to claim 10, a claim may not depend from a later claim. Claim 14 fails to end in a period.

Claim 13 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 11. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Claim 13 differs only in that the compound of claim 11 is called an emulsifier.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3518101.

The examples of the patent teach a bituminous emulsion formed using 0.75% of a salt of orthophosphoric acid and "Ethoduomeen T-12" a diamine falling within the scope of the instant claims wherein "R" is the alkyl residue of tallow fatty acid. The similar composition described would be expected to exhibit a similar pH (1-5).

The prior art of record fails to teach or suggest the improvements obtained when a system of the claimed emulsifier and a hydraulic cement demulsifier are used in forming an oil in water bituminous emulsion.

Art Unit: 1755

Claims 1, 4, 5 and 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2, 3 and 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
